Bartender: Endless Possibilities In Bar Design

For bar, restaurant or club, Bartender provides the most stylish and hardest-working solution, round the clock. It may be invisible to customers, but they'll see the difference in faster service, less harassed staff, and an all-round better atmosphere.

Installing Bartender is a business investment that will show returns day and night, week in, week out. Configured to maximise staff productivity and efficiency – and therefore turnover of customers – Bartender boosts sales and improves profits.

The bar-workstation concept is unique to IMC and epitomised in Bartender. From draught pumps to cocktail ingredients, glasses to cash till, everything is ergonomically positioned to minimise movement of bar staff and maximise serving speed and efficiency.

Stainless steel is not only the most stylish solution available for an underbar system. It's also the most practical. Easy to clean and maintain, it can take the knocks in the busiest bars and still stay looking good as new.

IMC's production facilities are rated to ISO9001:2000 – ensuring Bartender is designed and built to conform to exceptional quality standards. Every single element is manufactured to the highest specifications available, and stringently tested for the end-user's peace of mind.

Bartender By Day

Weekdays mean quick drinks, light snacks. Weekends mean lingering over wine and menus. The atmosphere is bright, light, fresh and busy. Bartender's clean stainless steel finish reflects the mood. Friendly, efficient; no panic, no pressure.

Bartender pioneered the unique concept of the bar-workstation: emphasising accessibility for bar staff. Each staff member can work within their own designated area, for greater efficiency, productivity and profitability.

Every individual element of the Bartender system is pre-manufactured to a standard design to reduce costs. But these elements can then be combined into an almost infinitely configurable and flexible complete system, to suit specific space, application or cost requirements.

Bartender By Evening

Nothing should disturb the seamless flow of drinks, food and conversation. Behind the scenes, and behind the bar, Bartender's flexible configuration lends itself to quiet good service.

Outstandingly versatile, Bartender can be configured to suit any serving situation. Nothing is unnecessary, inaccessible or inefficient. Everything is ergonomically designed for maximum ease of use.

Bartender By Night

The music's loud, the pressure's on. Everyone's out for a good time, with no time to waste or wait for slow service. Bartender's robust construction and maximised storage capacity keep things moving.

Bartender units are designed for ease of installation, whether building a bar from scratch or refurbishing. The individual construction of the units makes them easy to replace, or move round to reconfigure the system, with the minimum of disruption or costly downtime.

From pints to cocktails, Bartender makes it easy to serve quickly and efficiently. Spacious storage close at hand – for chilled bottles, cans and glasses – saves time, speeds service, and boosts profits.

Additional Products

Mistral bottle coolers offer a stylish and complementary addition to the Bartender system.
